

PRESS RELEASE

[For immediate release 20/02/2008](#)

The “Eagle” has landed

EmTek Racing Kawasaki has been a bit apprehensive awaiting the beginning of the racing season.

EmTek in its discussions with Kawasaki SA has been promised the new ZX 10's in the first week of March.

As with past experiences, we really only expected the bikes a week after that at the earliest. This being a result of new product, shipping delays, customs delays, weather, etc. all being part of the day-to-day experiences of importing anything into SA, especially if it is a “rush” job.

Well weren't we pleasantly surprised when Kawasaki SA gave us a call to say that the bikes had cleared customs and were ready for collection a mere 2 weeks ahead of what we actually expected.....

A great congratulations and huge thanks to Chris Speight and Gavin Lightfoot for **ALL** their efforts which has paid off for the Team in this regard.

Now we can get down to the “real” business and task at hand.

The new machines are being run-in as we speak and should be ready for race preparation over this weekend.

The team expects to have the bikes ready to testing by 01st March 2008.

We will bring you a test report once we have given the bikes a “shake down” of note. First impressions by the Team is “WOW... a 600 on steroids, awesome”.

We wish Chris and his Kawasaki SA team best wishes with this new monster and with the launch thereof, expected next week.
